Comparing advantages and disadvantages

Metal spiral bottle stopper	Soft wood and oak wood cork
Do not need to put the bottle deliberately, do not need special tools, don't need to understand engineering principle, don't need professional people's help, gently rotating the bottle can be opened easily.	Be affected with damp is perishable, wine damaged wood chips is easy to fall into the wine, the wine bottle should be kept backward, horizontal and need to open by can opener when using cork.

----- Color -----

How to use?

Rotating gently while downward stopper to seal bottles, stopper's non-slip silicone pressure to make the bottle mouth not easy to loose is ok. After using, remove the silica gel circle to wash clean with clear water and use soft cloth to wipe, to avoid the stopper surface scratched and affect beautiful shape.
